PUBLIC CALL FOR QUOTATIONS
SUPPLY AND INSTALLATION OF A SOLAR PHOTOVOLTAIC SYSTEM

The Malta Model Aircraft Flying Association (MMAFA) is inviting suitably qualified and registered solar-energy suppliers/installers to submit a quotation for the supply, installation and commissioning of a solar photovoltaic system at the Association's premises at Ta' Qali.

This project is being funded through the ***Sustainable Development Fund – Support Scheme for Voluntary Organisations.***

1. **Scope of works**

The quotation must cover all the equipment, materials, labour and services necessary to provide a complete and operational photovoltaic system.

The required system must include the following equipment or similar equipment offering equivalent or better specifications:

- Eight high-efficiency photovoltaic panels, each rated at approximately 715 W, providing a total installed capacity of approximately 5.6–5.72 kWp, or similar;

- One single-phase inverter rated at approximately 4.6 kW, or similar, suitable for the proposed photovoltaic system;
- Approximately 20 counterweights consisting of 9-inch solid bricks weighing approximately 49 kg each, or a similar and suitable mounting and counterweight solution;
- A protective membrane beneath the counterweights or mounting structures to prevent damage to the existing surface;
- Hoisting, positioning and laying of all counterweights and related equipment;
- All necessary mounting structures, electrical cabling, isolators, protection devices, connectors and accessories;
- Connection, testing and commissioning of the complete photovoltaic system;
- Assistance with the REWS application and all required technical documentation and certifications; and
- All labour, transport, lifting equipment and other services required to deliver a complete and operational installation.

The electricity meter is situated approximately 135 metres from the proposed location of the photovoltaic panels. Suppliers must consider this distance when calculating the required cable size, materials, voltage drop and installation costs.

2. **Quotation requirements**

The submitted quotation must clearly include:

- The supplier's full name, address, VAT number and contact details;
- A detailed description of the proposed system;
- The number, type, manufacturer, model and output of the proposed photovoltaic panels;
- The manufacturer, model and capacity of the proposed inverter;
- The total installed system capacity;
- The total price, including VAT;
- The estimated delivery and installation period;
- The proposed project-completion date;

- Warranty periods covering the photovoltaic panels, inverter and installation; and
- Any exclusions, conditions or additional costs.

All quotations received will be formally documented and retained in the Association's records, as required by the funding conditions.

3. **Fiscal-document requirements**

The selected supplier must issue the appropriate fiscal document in accordance with the Value Added Tax Act and the requirements of the Malta Tax and Customs Administration (MTCA).

The fiscal document issued shall be one of the following, as applicable:

- An official fiscal receipt generated by an approved fiscal cash register or approved computerised system, including the applicable EXO number;
- An official fiscal receipt issued from an authorised MTCA fiscal receipt book; or
- A VAT tax invoice complying with the requirements of the Value Added Tax Act, together with proof of payment.

***Grey-box receipts will not be accepted*.**

4. **Submission procedure**

Quotations must be submitted by email to:

info@mmafataqali.com

The email subject should read:

"Quotation – Supply and Installation of Solar PV System – MMAFA"

The deadline for submission is:

31 August 2026

Quotations received after the specified deadline may not be considered.

Requests for clarification or arrangements for a site visit must also be sent to the above email address before the submission deadline.
